TOUREUROPEANRALLY

“The TOUR EUROPEAN RALLY – TER project was born to merge the assets of some outstanding rally events in Europe and create a “Championship” in order to have an enhanced global promotion.

The chosen events must have outstanding characteristics: based in tourist-oriented areas, they must possess unique specific features different from the other championship events and they must display an excellent touristic and/or historical background. In all the TER rounds, the “TER RALLY VILLAGE” will enable each event to promote and share its location, tourist packages, food, history, etc.

The TER Championship and its locations are promoted through a wide TV Coverage around the world with main partners such as FOX Sport and MotorsTV, by social networks and the most important web platforms, by newspapers, magazines, and other important media”.

RIV
RALLYE
INTERNATIONAL
DU VALAIS

In 2016 the Rallye International du Valais will celebrate its 57th running. It was first organised in September 1960. Besides being a lifelong round and the highlight of the Swiss Rally Championship, the RIV has been part of the European Rally Championship from 1980. It has also been a round of the Intercontinental Rally Challenge in 2007-2008. From 2009 to 2015, the event has been included in the FIA European Rally Championship and was awarded the trophy for the best organisation in the 2013 ERC. It also constitutes a round of the newly created FIA R-GT Cup. This year, the event joins the Tour European Rally, while still counting towards the FIA European Rally trophy.

The geographical situation of the Rallye International du Valais, in the heart of Europe, the breathtaking sceneries of the region and asphalted roads that are among the most demanding of the discipline are as many assets to seduce the most intransigent drivers, as well as an enthusiastic, connoisseur and hard to please audience. Regular visitors are full of praise for the unique character of its remarkable route from the sporting point of view, the quality of its organisation and

the high-level infrastructures it uses, as well as the warmth of the welcome and the attraction from an unparalleled backdrop.
